

Occupational Employment Statistics

SOC-Based Occupational Wage Estimates

Base data are obtained from the Occupational Employment Statistics (OES) survey, a semi-annual voluntary mail survey of approximately 17,500 (per year) Ohio employers. The data presented below reflect 1999, 2000, 2001 and November 2002 survey data aged to the 3rd quarter 2003 by applying the 3rd quarter 2003 Employment Cost Index (ECI) to the 2002 database. ODJFS has aged the official OES data series for the state and metropolitan areas, which was developed in cooperation with the Bureau of Labor Statistics (BLS) and in addition, produced estimates for Ohio Economic Development Regions and counties. These estimates are not official BLS data series but ODJFS feels that they provide additional information that is useful to users of ODJFS data. Additional information and the official 2002 OES data series can be found at [BLS OES Home](#). See [Standard Occupational Codes and Definitions](#) for a listing of SOC-based occupational codes, titles, and definitions.

Sort options: [SOC Code](#) [Occupational Title](#) [Employment](#)

Occupational Wage Survey Estimates Miami County						
SOC Code	Occupational Title (click to display definition)	Employment	Average Hourly Wage	Median Hourly Wage	Middle Range	Average Annual Wage
13-2011	Accountants and Auditors	300	\$23.69	\$22.64	\$16.37 - \$29.24	\$49,275

Occupational Employment Statistics Wage Data

The definition of a wage for the Occupational Employment Statistics (OES) program is straight-time, gross pay, exclusive of premium pay. Among the inclusions in the wage are base rate, cost-of-living allowances, guaranteed pay, hazardous-duty pay, incentive pay including commissions and production bonuses, and on-call pay. Some exclusions from the wage are back pay, jury duty pay, overtime pay, severance pay, shift differentials, non-production bonuses, and tuition reimbursements.

There are certain occupations for which the mean hourly wage is not typical. Individuals in these occupations are paid on an annual basis and generally work fewer than 2,080 hours per year (40 hours per week x 52 weeks). Occupations for which annual data are provided are teachers, musical and entertainment occupations, aircraft pilots and flight attendants.

Employment

The Occupation Employment Statistics Survey defines employment as the number of workers who can be classified as full or part-time employees; workers on paid leave; paid owners, officers and staff of incorporated firms and workers assigned temporarily to other units. Excluded are contractors and temporary agency employees not on the payroll; unpaid family workers; workers on unpaid leave and proprietors, owners and partners of unincorporated firms.

Employment represents the estimate of total wage and salary employment in an occupation across the industries in which it was surveyed. Not every occupation appears on the every survey form. Data for specific occupations are collected from establishments within industries that are the predominant employers of labor in those occupations.

Average (Mean) Hourly Wage

The average hourly wage is the estimated total wages for an occupation divided by its weighted survey employment.

Median Hourly Wage

Median hourly wage is the estimated 50th percentile of the distribution of wages. Fifty percent of

workers in an occupation earn wages below, and 50 percent earn wages above the median wage.

Middle Range

The middle 50 percent wage range includes those wages from the 25th to the 75th percentile of the distribution of wages. The two wage rates displayed are the 25th and 75th percentiles of the distribution respectively.

Average Annual Wage

The average annual wage is the average hourly wage times 2,080 work hours per year.
